## Operations Avoided.

When a physician tells a woman suffering with ovarian or womb trouble that an operation is necessary, it of course frightens her.

The very thought of the operating table and the knife strikes terror to her heart.

And our hospitals are full of women who are there for ovarian and womb operations!

It is quite true that these troubles may reach a stage where an operation is the only resource, but such cases are much rarer than is generally supposed, because a great many women have been cured by Mrs. Pinkham's medicine after the doctors had said the operation must be performed.

Lydia E. Pinkham's Vegetable Compound has been very successful in curing ovarian troubles. In fact, up to the point where the knife must be used to secure instant relief, this medicine is certain to help. Ovarian troubles are easily developed from womb

troubles, and womb troubles are so very common that ovaritis is steadily on the increase among women. It is, nevertheless, a most serious trouble, and to recommend wrong treatment for it is a crime for which there cannot be too deep a penalty.

It is, therefore, with full consciousness of the seriousness of the disease and the steady failure of other medicine to cure it, that we present for ovarian and womb trouble Lydia E. Pinkham's Vegetable Compound as the most certain to help of any medicine in the world to-day. Any person who could read the letters in Mrs. Pihkham's files at her office in Lynn, Mass., would be convinced of the efficiency of Mrs. Pinkham's Compound.

The strongest and most grateful statements possible to make come from women who have escaped the operating table by the use of this medicine. Let any woman suffering from these troubles, or anything which may develop into them, write and get Mrs. Pinkham's advice. If you are beyond the reach of the medicine, you will be fraukly told so, but, if not, you will be fully and carefully and kindly advised.

The most serious of all the diseases of women, as well as the minor ills, are promptly overcome by

Lydia E. Pinkham's Vegetable Compound.
